

Wind Turbine Move

OVERVIEW

**May 24
thru
End of July
Monday-Friday**
(no weekends or holidays)

There are 44 wind turbines destined for the Hatchet Ridge Wind Farm that will start moving to Burney on May 24. The main parts of the wind turbine are three base sections, three blades, and one nacelle (or turbine). Large parts will be delivered daily on oversize load trucks. Trucks from Gerber and from the Nevada State Line will begin transport in the early mornings, every day except weekends and holidays. CHP will be providing escorts in various locations.

IMPACT

There may be intermittent traffic control in effect as needed in various locations. Motorists are advised these loads will be traveling through their areas daily and should be prepared for localized delays. Watch for press releases for more detailed information.
